PROFESSIONAL SUMMARY

Results-driven Cybersecurity Professional with 5+ years of experience in Security Operations Centre (SOC) analysis, SIEM/SOAR deployment, threat intelligence, and digital forensics & incident response (DFIR). Certified Ethical Hacker (CEH), EC-Council Incident Handler (ECIH), and Computer Hacking Forensic Investigator (CHFI) — adept at identifying, containing, and remediating sophisticated threats across enterprise environments. Currently delivering SOC operations for a national government project, with hands-on experience in application security testing, log analysis, and security event correlation across complex enterprise environments. Proven track record delivering security engineering solutions for government and commercial clients across Bangladesh and the Asia-Pacific region.

CERTIFICATIONS

CSA	CEH	ECIH	CHFI
Certified SOC Analyst *EC-Council*	Certified Ethical Hacker *EC-Council*	EC-Council Incident Handler *EC-Council*	Computer Hacking Forensic Investigator *EC-Council*

- Certified SOAR Analyst & Administrator – Swimlane Turbine — Swimlane
- SOC Analyst Level 1 — Cybrary
- Penetration Testing for Freelancing – Level 4 — NSDA, Government of Bangladesh
- Splunk 7.x Fundamentals Part 1 — Splunk
- Certified Integrator – Anomali (Certificate No. 156958628) — Anomali
- PAM Core Access Control Engineer — Senhasegura
- CCNA — Linux Pathshala
- Offensive Penetration Testing — Cybrary
- Introduction to Cybersecurity Tools & Cyber Attacks — Coursera

CORE COMPETENCIES

- SIEM/XDR: Stellar Cyber, LogRhythm, Elastic, Wazuh
- SOAR: Swimlane – Playbook Design & Automation
- Threat Intelligence (CTI): Anomali, OpenCTI, MISP
- Digital Forensics & Incident Response (DFIR)
- Penetration Testing & Vulnerability Assessment (VAPT)
- Endpoint Detection & Response (EDR/XDR)
- AD Security & Identity (Semperis, PAM/Senhasegura)
- Network Security & Traffic Analysis
- Python & Shell Scripting for Security Automation
- Incident Lifecycle Management & Forensic Reporting

PROFESSIONAL EXPERIENCE

SOC Analyst — NBR Project | Express Systems Limited (ESL), Bangladesh *Sep 2025 – Present*

Lead SOC analyst providing 24/7 security monitoring and incident response for a national government project.

- Execute continuous monitoring and triage of security alerts and events using Stellar Cyber SIEM/XDR, safeguarding national digital infrastructure.
- Conduct automated and manual penetration tests with Pentera to identify vulnerabilities and assess system resilience against real-world exploits.
- Lead incident response operations — containing, eradicating, and recovering from cybersecurity incidents in collaboration with NOC and security teams.
- Perform in-depth vulnerability analysis; provide risk-prioritised remediation recommendations to harden enterprise security posture.
- Manage the full incident lifecycle from initial triage through root-cause analysis to stakeholder reporting and post-incident review.
- Deliver data-driven advisory to improve defensive strategies aligned with emerging threat intelligence and global threat trends.

Cyber Digital Transformation Engineer | OneWorld InfoTech, Bangladesh *Apr 2023 – Sep 2025*

Drove enterprise-wide implementation of SOAR and SIEM platforms; led client-facing engagements for security automation and transformation.

- Implemented and managed Swimlane SOAR; engineered automation playbooks for Threat Intel Triage, IP Blocking, Deception-based IP Blocking, and Malware Analysis & Response.
- Deployed and customised SIEM platforms (Wazuh, Elastic Security, LogRhythm) including dashboard design, custom alert rules, and Elastic decoder development.
- Conducted proactive threat hunting leveraging OSINT and CTI feeds (Anomali, OpenCTI, MISP) to detect persistent and advanced adversarial activity.
- Performed Digital Forensics & Incident Response (DFIR) on compromised systems; produced forensic evidence reports for legal and compliance purposes.
- Implemented VAPT tools including CoreImpact and Tenable SC / Qualys VMDR; delivered training sessions to client security teams.
- Engaged enterprise clients to assess security needs and presented tailored solutions: PAM (Senhasegura), AD Security (Semperis), SOAR (Swimlane), and SIEM (Elastic Security).
- Authored comprehensive RFP responses including technical specifications, solution architecture, and implementation roadmaps.
- Led and mentored the cybersecurity team; provided daily guidance on project delivery and complex security challenges.

IT Security Executive | Protik Ceramics Ltd., Bangladesh *Mar 2022 – Mar 2023*

Sole security practitioner responsible for end-to-end IT security of a mid-sized manufacturing enterprise.

- Conducted proactive threat hunting, root-cause analysis, and digital forensics to detect, contain, and remediate security incidents.
- Performed VAPT on web applications and conducted source code analysis; produced detailed findings reports with actionable remediation plans.
- Monitored and correlated security events across multiple log sources to identify and respond to suspicious activity.
- Managed system hardening, patch management, and security package configuration to maintain compliance and system integrity.
- Assessed phishing risks and secured enterprise email and ERP platforms to protect business-critical operations.

Cybersecurity Engineer | TechForing Ltd., Bangladesh *Mar 2021 – Feb 2022*

- Performed VAPT on web and mobile applications (iOS & Android); employed Burp Suite Professional, OWASP ZAP, MobSF, Radare2, Apktool, and reFlutter.
- Conducted static and dynamic mobile application security analysis, including reverse engineering and binary analysis.

- Led security assessment teams; assigned tasks and ensured project milestones were met on schedule.
- Managed full vulnerability lifecycle: scope definition, scanning, false-positive review, manual verification, reporting, and remediation tracking.
- Developed custom penetration testing scripts tailored to client application features and business logic.

TECHNICAL SKILLS

SIEM / XDR: Stellar Cyber, LogRhythm, Elastic Security, Wazuh

SOAR: Swimlane Turbine — Playbook design, automation, case management

Threat Intelligence: Anomali ThreatStream, OpenCTI, MISP

IR / DFIR: TheHive, Cortex, Autopsy, FTK Imager, Volatility, NetworkMiner, Wireshark

VAPT Tools: Pentera, CoreImpact, Burp Suite Pro, Qualys VMDR, Tenable SC, Nessus, Nmap, Metasploit, Mimikatz, OpenVAS

Identity & PAM: Semperis (AD Security), Senhasegura PAM

Scripting / Dev: Python, Bash/Shell, Java, PHP, JavaScript, MySQL

Network: Wireshark, Nmap, CCNA-level networking, TCP/IP, DNS, VPN, Firewalls

OS: Windows Server, Linux (Ubuntu, Kali, CentOS), Active Directory

Frameworks: MITRE ATT&CK, NIST CSF, ISO 27001, OWASP Top 10, Cyber Kill Chain

EDUCATION

B.Sc. in Computer Science & Engineering

United International University (UIU), Bangladesh

AREAS OF INTEREST

Security Engineering • Penetration Testing • Malware Analysis • Incident Response • Cloud Security • DevSecOps • DFIR • Threat Intelligence • Database Security • Network Security
